

Made Crystal Clear

Short, visual tech guides that make one technology genuinely clear: diagrams and everyday analogies before jargon, numbered recipes with expected results, honest business chapters, and every claim dated and traceable to a numbered source list.

The books

Lovable	181 pages	Free PDF/EPUB (Amazon soon)
Vapi	240 pages	Free PDF/EPUB (Amazon soon)

AI	127 pages	Amazon + free PDF/EPUB
Claude Code	150 pages	Amazon + free PDF/EPUB
Git	74 pages	Amazon + free PDF/EPUB
Kimi Code	156 pages	Amazon + free PDF/EPUB
Hermes Agent	80 pages	Amazon + free PDF/EPUB
GitHub	266 pages	Amazon + free PDF/EPUB
Docker	193 pages	Amazon + free PDF/EPUB
The +1 Method	94 pages	Amazon + free PDF/EPUB

The method

Each book is built from three source tiers: the product's own documentation, credible independent research, and reader signal gathered from the communities that actually use the tool. What readers struggle with sets the chapter order. What the research cannot verify is said plainly rather than papered over.

The author

Christophe Paka is a self-taught developer, digital nomad, and creator of a 700K-view YouTube channel on tech careers. He builds this series to make established and emerging tech clear for everyone.

Formats and availability

Every title is free to read as PDF and EPUB via links from **madecrystalclear.dev**. Paperback and Kindle editions are on Amazon; per-title links live on each book's page.
